Any variations to the regulated components that are applicable and new ones that may appear, shall be transferred to the customer both upwards and downwards. Any other charges made by the distribution company such as reactive energy, lease of metering equipment, rights, etc. shall also be transferred to the customer.

Likewise, the power terms and power units may be updated on 1 January each year, in accordance with the real value of the CPI (Last General Inter-Annual National Consumer Price Index published officially at the time of the update).

Time periods: The customer can choose the Happy hours from three options and may change it in the future for the entire billing cycle in progress and after: (a) Two consecutive hours of every day, which will be repeated every day, (b) one entire day of the week, which will be repeated every week or (c) the 50 hours of highest consumption of the month (the number of Happy hours will be proportional to the days included in the invoiced period).

Hourly consumption: To bill the energy, the consumption made will be used as indicated by the distributor according to the hourly load curve. If at the time of billing there is no such hourly consumption, the consumption will be distributed hour by hour in accordance with the "Pa" profile published by Red Eléctrica de España (www.ree.es).

The billing period will bimonthly for paper bill (except if customer has a maximeter as a power control) and monthly for electronic invoice (conditioned on the distributor provide measurements).

This offer is conditional upon the concession of the 2.0DHA or 2.1DHA access tariff by the distribution company. Otherwise, Endesa reserves the right not to activate this contract or to activate it maintaining the previous technical conditions and to ask for access at a later date, adjusting the technical conditions when they are granted.

This offer requires telemanagement measurement equipment with hourly consumption.
